The finishing touch

A button does more than fasten a jacket. It gives it character.

A quiet tonal match brings harmony; a contrasting finish draws the eye.

Look closer and the smallest details begin to tell their own story:

the curve of a rim, a play of colour, the way a surface catches the light.

Choose the detail that feels like you, and let it bring the whole

jacket together. Luxury lives in the details you return to.

Explore each button in the companion flipbook

Select a button to see it styled on a jacket with its source image.

Jacket views are illustrative composites, not product photographs

of finished garments. Garment scale is not physically calibrated.
